

Program 16

October 25, 2022

1 PROGRAM 16

Aim : Write a program to find transpose, determinant and inverse of a matrix.

Date :19/08/2022

By :Anu C Scharia

```
[13]: import numpy as np
m=np.array([[2,3,1],[1,2,3],[5,1,2]])
print(m)
print("Transpose :",np.transpose(m))
print("Determinant :",np.linalg.det(m))
print("Inverse :",np.linalg.inv(m))
```

```
[[2 3 1]
 [1 2 3]
 [5 1 2]]
Transpose : [[2 1 5]
 [3 2 1]
 [1 3 2]]
Determinant : 32.0
Inverse : [[ 0.03125 -0.15625  0.21875]
 [ 0.40625 -0.03125 -0.15625]
 [-0.28125  0.40625  0.03125]]
```

```
