

# Program 18

October 25, 2022

## 1 PROGRAM 18

**Aim :** Write a Pandas program to add, subtract, multiply and divide two Pandas Series

**Date :** 24/08/2022

**By :** Anu C Scharia

```
[14]: import pandas as pd
      arr=[2,4,6]
      a=pd.Series(arr)
      print("One dimensional array :\n",a)
```

One dimensional array :

```
0    2
1    4
2    6
dtype: int64
```

```
[ ]:
```
